Highlights

Optimized for HDTV

High speed data transfer with minimal signal loss ensure you'll get the most out of HDTV.

Quality construction

Quality construction uses only top grade materials to create products of extended durability.

Gold-plated connectors

Gold-plated connectors provide better conductivity by lowering contact resistance. They also prevent connector deterioration through oxidation.

Minimum signal loss

Signal information is inevitably lost going from any digital source to any TV. Minimum signal loss means you only lose the least amount of that signal information.

Corrosion-resistant connectors

Compressed brass with 24K gold-electroplated connectors creates a secure and extremely durable connection that optimizes signal quality and delivers the best picture and data transfer.
